

The Umbra Initiative | Doomsday Protocol

In the case of The Umbra Initiative is found out by any unauthorised third party, Doomsday Protocol will be initiated.

In this protocol, there will be an overview on what to do if it is initiated, and how you will know it has been initiated.

Overview

If the Doomsday Protocol is Initiated you will be texted the following code word to your phone: **"Alayna"**.

If you get texted that code, **you are to remain cool**, do not reveal anything, do not say a word unless it is to a trusted individual who has sworn to keep TUI secret, **OR** you may speak about it secretly to other members of TUI.

Once you have any time in the day that is free, you are to proceed to the nearest Headquarters of TUI, which is at the location designated to you.

You will then be briefed on the incident that occurred. These incidents can include the following:

- TUI is made no longer secret
- TUI is under an immediate threat
- Numerous agents have fallen
- TUI needs to move locations due to a leak of location having been made aware to the government/police/threatening oppositions

Access Year: 1983 – the founding year of TUI.

Access Month: 05 – representing May, the month of creation.

Access Day: 9 – a singular digit representing the day the initiative was enacted.

HQ Digit Code: 239 – used to identify your nearest secure Headquarters.

The Umbra Initiative | Doomsday Protocol

If any of these incidents occur, **you will take the following steps:**

1. **Proceed immediately** to the nearest Headquarters. Use your HQ code (239) to verify entry.
2. Once inside, report directly to the **Senior Agent** or **Director** on duty. You will be briefed on the exact nature of the breach.
3. After briefing, you may be issued:
 - o A **new code name**
 - o The **new location** of the relocated Headquarters
 - o Or a **notice of full operational suspension** until secrecy has been re-established

Conclusion

At **The Umbra Initiative**, we hope we never encounter the need to initiate the **Doomsday Protocol**.

But if you do, keep this protocol in mind and respond the **TUI Agent way** – **correctly, professionally, and silently**.

Keep TUI **safe, secret, and confined**.

And remember: **1983.05.9.239** – the access sequence only a true agent would understand.
